CASEMENT RESTRICTOR CATCH

Casement Only - Type 1

- ❖ Spring loaded safety and security catch.
- ❖ Suitable for outwards opening windows.
- ❖ Gives up to a maximum of 50mm opening providing both ventilation and child safety.
- ❖ To release catch from secured position, pull window back and hold the spring loaded arm.
- ❖ Catch automatically engages studplate upon closing.

Casement Only - Type 2

- ❖ Suitable for outwards and inwards opening windows.
- ❖ Restricts opening to a maximum of 100mm, providing ventilation and child safety.
- ❖ Stay arm easily released with a screwdriver from sash/frame bracket for full opening of window.
- ❖ Manual engagement required to regain safety operation.

DOOR RESTRICTOR

- ❖ Hold Open Door Restrictors is available with passivated mild steel arms as standard.
- ❖ The restrictor body fits in the full depth eurogroove at the top of the door and restricts the opening to 90 degrees or more, depending on where the frame part is fixed.
- ❖ The hold-open function prevents the sash from blowing closed in normal wind conditions.
- ❖ The restrictor features a Friction Pad.
- ❖ The door restrictors are designed to operate in a minimum 12mm air gap.
- ❖ Complete with mouldings to NYLON 66 for less wear and greater durability.
- ❖ Different positioning of the frame/sash parts will give the required hold open position.
- ❖ The friction can be easily adjusted and the arm can be disconnected should it be necessary to open the door fully.
- ❖ Can be retro fitted to existing doors.

NOTE: The hold facility is robust but is not designed to cope in strong wind conditions.
