ULTION 3* SECURITY CYLINDER

The Ultion lock has been tested to the needs of the British Standard TS007 3 star, without having to be bolstered with an expensive high security handle or guard.

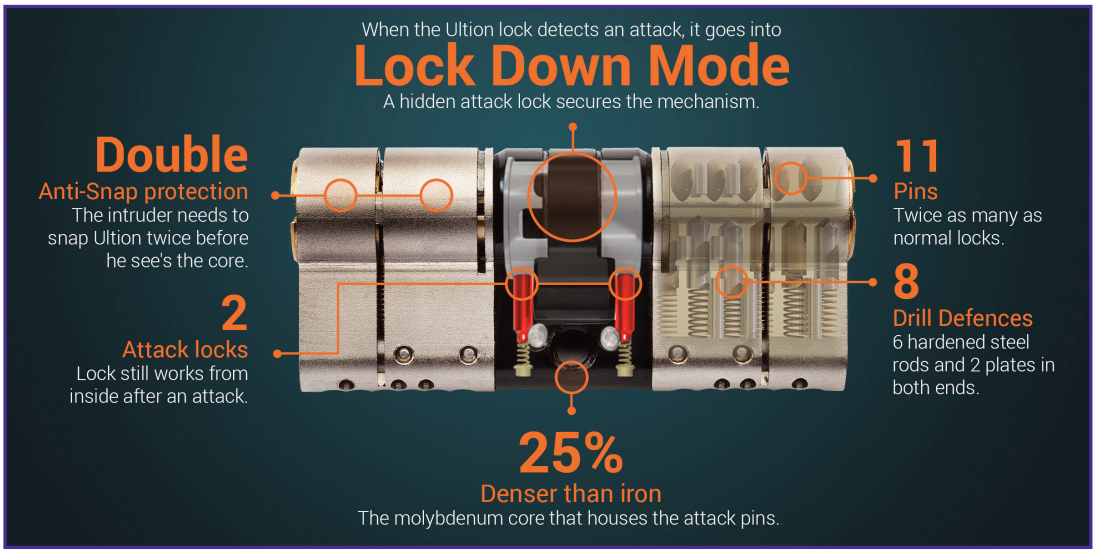

When Ultion is locked it is the actual centre cam that gets independently secured, not secured to the internal plug – this means that even when the key is left on the inside of the lock, Ultion is still secure.

Dual Colour cylinder option pictured

FEATURES & BENEFITS

- Ultion has passed all major british standard tests for security.
- Meets the highest TS007 3-Star rating
- Sold Secure Diamond testing in conjunction with The Master Locksmith Association
- A hidden lock is activated inside your Ultion door lock when it detects an attack.
- 11 pins allowing for 294,000 key combinations
- Double Anti-Snap protection
- 8 drill defences with 6 hardened steel rods and 2 plates in both ends.
- Available options: Double Cylinder / Cylinder and Turn / Keyed Alike.
- Dual colour, Polished Chrome and Polished brass finishes available
