Now in our 28th Year of successfully supplying quality windows, doors and conservatories

Autumn 2021

“ENVIRONMENTALLY FRIENDLY AND ENERGY EFFICIENT”

Its that time of the year when usually the sales start to slow down and homeowners hibernate until Christmas and into the New Year.

However, with so much reporting in the press of huge household energy price rises and the increased cost of heating homes, energy efficient windows will now surely be top of a homeowner's Xmas list this year?

The benefits of well fitted, double and triple glazed windows not only reduce energy bills by reducing the amount of heat lost into the atmosphere and therefore saving money, but they will also reduce your carbon footprint. Using less energy to heat the home ultimately reduces the amount of carbon emissions that are currently damaging our planet and is a 'tick' in the fight against climate change.

We have put together an information sheet on energy efficient windows and have placed it in the Technical section of our website for you to download and pass on to your customers. If you would like your logo and contact details put on this sheet, just let your sales rep know and they will arrange for you.

Congratulations to DH Glazing in Norfolk, WINNER of our Installation Photograph Competition - more details over...

INSTALLATION PHOTOGRAPHY COMPETITION

Thank you to everyone who entered our competition, showcasing their favourite installations undertaken recently.

The images were seen by a selected group of Climatec and Alu-tec colleagues and the votes counted to reveal the winning installer and subsequent runner up.

WINNER

DH GLAZING was crowned the winner with these images of their installation of anthracite grey REHAU flush and fixture windows along with a Deceuninck Slider 24 door. These windows and doors look stunning on this unique looking property. Congratulations.

RUNNER UP

COSYHOMES WINDOWS Came a very close second with this installation of REHAU white windows complete with black outerframes plus an impressive looking, AluK five pane aluminium bi-fold door. Fantastic work!

AUDIT PASS FOR CLIMATEC & ALU-TEC

We are pleased to announce that Climatec's uPVC team, and the aluminium team at Alu-ec, have passed their annual BSI audit and are now accredited for another year for the company management and quality systems.

These annual audits focus on every process of the business and the documentation control, from initial quote received and the subsequent order process, through to fabrication and quality control.

A big thank you to our colleagues for taking time out of their busy day to assist the auditor and achieving another pass for our company.

SUCCESSFUL ETL WELD TEST FOR THE REHAU RIO DOOR SASH

We moved another step forward last week in being able to offer the Rio flush Sash door, following a visit from Jade Engineering to test our milling capabilities for the ETL Welds.

The Rio door will only be available at launch as a single door, opening outwards. The door can be manufactured as welded outerframe/welded sash or welded outerframe/ETL sash. A mechanical corner joint option will not be available, although the midrails will be mechanically jointed.

Choices of outer frames will be as our existing REHAU door frames in both Total70C and 70S and will be available in the same colour options as the Rio flush windows.

A dedicated 3D, fully adjustable hinge from hardware supplier SFS will enable the door sashes to hang on 3 hinges only.

This single residential door is a further addition to our flush fit portfolio that offers a traditional style to any property.

DOOR STYLES AVAILABLE
