

vista

the newsletter from The Climatec Group

Now in our 32nd year of successfully supplying quality uPVC and aluminium windows, doors and conservatories

Summer 2025

As we move on a few months from our Spring Vista, we've been pleased to see our customers embrace the new products introduced in that last issue.

Alu-tec have manufactured a variety of styles from the Aluminium Heritage door system. This new steel replacement / Crittal styled door looks great sat next to the windows available in the same system.

With multiple configurations available, homeowners are able to create a very modern, industrial look for the home, or simply replace their original steel windows and doors with a like for like product.

The slim, steel look of these external doors are a popular choice for the back of a home, but can also be used as a front door or as part of a porch too.

Information on our Heritage door and window systems can be found on the Alu-tec website and includes brochures, data sheets and order forms to download. www.alu-tec.co.uk

Climatec Windows has also seen an interest in the new decorative and flat panels launched in the last issue of Vista.

This Victorian door recently installed by our Home Improvements team (pictured left) shows off the Raised and Fielded panels perfectly, and literally transforms the door into something more spectacular.

The new flat panels in a larger range of colours have also been well received for those wanting to colour match front and back doors with the windows.

You can find details of all our panels and mouldings in the Spring issue of Vista on both Climatec and Alu-tec's websites.

ALUMINIUM FLUSH CONTEMPORARY DOORS

Alu-tec
Windows & Doors

**NEW
PRODUCT**

These new contemporary flush entrance doors from Alu-tec, combine the AluK 77ID fully rebated door profile with a collection of aluminium door panels structurally bonded to the face of the door sash.

The polyamide panel design delivers exceptional long lasting performance with a maximum bowing tolerance of only 2.5mm under heat stress, meaning it won't stick regardless of the temperature outside.

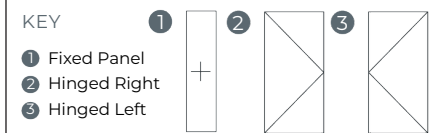

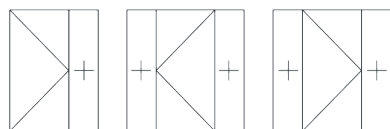

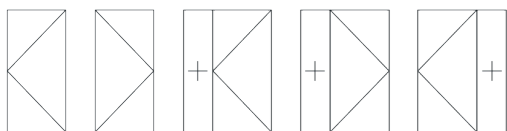

12 panel designs are available in our standard colours of Hipca White, Anthracite Grey and Jet Black, and for a more personal finish they can be specified in any RAL finish, single or dual colour if required.

If you require something a bit more special, you can choose from an extra three premium designs from the Oxide collection that feature a specially formulated metallic look finish perfect for high-end architectural projects.

BRUNO DOOR FROM THE PREMIUM OXIDE COLLECTION

DOOR CONFIGURATIONS

DESIGN FEATURES

- ❖ Slim outerframe
- ❖ Thermally broken aluminium profile for improved energy efficiency

NEW - WINDOW AND DOOR HANDLES

Introducing a classical handle collection that suits both our aluminium and uPVC windows and doors

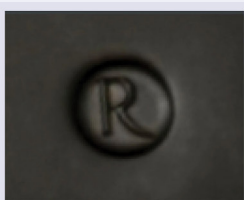

The Knurled Handle collection from luxury hardware manufacturer, Regal, is a perfect addition to our hardware portfolio with its uniquely distinctive appearance suiting both our aluminium and uPVC products for contemporary and heritage styled homes.

The window and door handles feature a crosshatch grip, created by a process called knurling, which involves creating a regular pattern of indentations on the handle's surface. The textured surface is aesthetically pleasing with a modern and industrial look to them, and also practical in providing a better grip for the user.

The handles are available in four finishes; Antique Bronze, Matt Black, Satin Chrome and Gun Metal, and information and dimensions can be found on both the Alu-tec and Climatec Window's websites.

NEW DRAINAGE SOLUTION - OPEN IN DOORS

After feedback received from customers about the current drainage aesthetics on our open in doors, we have now re-designed the face drainage routes to provide a new solution using our door drip bar.

The drainage slots are now positioned behind the drip bar and not on the front of the door providing a sleek and cleaner look and eradicating the worry of drainage caps falling off and going missing.

NEW - LOW ALI THRESHOLD

- FOR RIO FLUSH DOORS

A better low ali threshold design for our REHAU flush doors is now being used on all outward opening Rio doors that require one.

The OUM 70 RITB Door Threshold is also available with a subcill option providing a nicer finish to the single and double flush doors and a more acceptable styling for homeowners.

Our hardware specification sheet has been amended and can be found in the information centre of the Climatec Website.

We're Saying Goodbye to Barbara Bond

After 24 and a half years, Climatec Windows receptionist, Barbara Bond is hanging up the telephone, and heading off into the retirement sunset on Friday 11th July.

Barbara, who was originally GPO trained as a telephonist, has been your first point of contact when submitting orders and telephoning Climatec. Now, after 24 plus years of witnessing many changes in the company, the window industry and the people around her, she is now ready to enjoy some time for herself with her partner Chris, family and friends.

Barbara tells us she's also thinking about getting a second dog too to keep her busy and will also enjoy her newly renovated garden while the weather is good.

What will Barbara miss about the job and Climatec? "I have got to know a lot of customers of these 24 years, and have met some really nice people. I've made some really good friends too, who I will stay in touch with and I will miss the banter in the office for sure. However, I'm ready to say goodbye to the work, the early starts and the drive into the office and just enjoy some new found downtime."

We are sure you will join us in wishing Barbara a very Happy Retirement.
